

LITERACY ACTIVITY

Compound Foldable

Place a piece of paper length wise on the table. Fold the left-hand side to touch the middle and fold the right-hand side to touch the middle. Take scissors and make 3 small cuts that stop at the fold, making 4 equal sized sections. Do the same on the right-hand side.

Inside the 2 sets of flaps write a compound word and draw a picture in the middle of the foldable.

Close the flaps over top of your image and break that compound word into 2 separate words. Place the first word on the left-hand side flap and the second word on the right-hand side flap. Draw an image for both of these words.

Ex/ skateboard (inside) = skate (left flap) board (right flap)
raincoat (inside) = rain (left flap) coat (right flap)
snowman (inside) = snow (left flap) + man (right flap)
