

Watery Wonders of the World

Activity 1: Explore & Write

Take a tour of oceans around the world with the video "The World's Oceans" which is found below the story in the Teaching Resource Section.

Using the maps shown in the video, draw a map that shows the locations of the world's continents and ocean. Which ocean would you like to visit the most? Why? Put a star on your map in the ocean that you would want to explore the most.

Activity 2: MAP IT and Create

Look through the Map It slideshow found on the right hand side of your story next to the title. See if you can answer the quiz questions correctly. Then choose a watery destination listed in the slideshow. Create a travel brochure for this location, including facts, drawings or pictures about the place.
