

CAKE CHEMIST

Activity 1: Read & Write

What science-inspired treats would you like to make for a themed party? Plan out 5 treats, thinking about what would make a spectacular cake, cupcake, or cookie. Draw what each treat would look like and describe how each treat would taste. Don't forget to give them each a name!

Activity 2: Design

In your journal design your dream cake that you would love to have for your birthday. Think of another cake idea for an occasion that is unique and not usually celebrated with cake.
