

Would you take a trip to space?

Activity 1: Debate A Side

Read the debate along with a family member or friend. Together, talk about the pros and cons of taking a trip to space. Then, each of you can decide whether you would like to blast off to space or not and share your points with family members. See if you can get family members to side with you.

Activity 2: Watch & Write

Scroll down to the bottom of the story and find the video entitled

"What You Need to Know About the Moon" under the multimedia heading.

Watch the video and use what you learn from the video and the debate to write a paragraph about whether you would like to be the next astronaut to explore the moon.
