

ACTIVITIES IN THE BUSH - MATH

What time is it Mr. Wolf?

One or many people (the bunnies) stand far away from the chosen wolf, who faces the opposite direction. The bunnies call out, “What time is it Mr. Wolf?”. The wolf can answer a time (e.g.: “It’s 5 o’clock”) and the bunnies take the same number of steps towards the wolf (e.g.: 5 steps). The wolf can also say: “It’s time for Siipaai!”, and then the wolf has to tag one of the bunnies who will become the next wolf.

For older children, the wolf can say a math equation to tell the bunnies the number of steps they have to make.
