

ACTIVITIES IN THE BUSH - MATH

Less, Equal or Greater than

Use two plastic identical bowls or plates. Put elements from the land on each plate; the number of elements on one plate can be less, equal or greater than the other plate. Use twigs to make the corresponding symbol between the plates on the ground.

With older children, give different values to different elements (e.g.: pinecones are worth 1 unit, rocks are worth 5 units, and leaves are worth 10 units).

Use your preferred language! 😊
